

AI Leadership for Corporate Boards

Leading Responsible AI for Value Creation

Book by Fernanda Torre · Liselotte Engstam · Robin Teigland

Why AI Leadership Belongs in the Boardroom

AI is reshaping strategy, risk, leadership, culture, sustainability and long-term value creation. The question is no longer whether boards need to engage with AI, but **how they lead and govern in an AI-enabled world.**

Who This Book Is For

Board Chairs · Board Directors · CEOs · Governance Leaders · Senior Executives

From Understanding AI to Leading with AI

The book's **AI Leadership House** integrates:

Strategic AI ambition · Operational capabilities · AI governance · Sustainability · Board accountability, competence and structure.

What Boards Need to Get Right

Set a bold and responsible AI ambition

Guide AI-driven value creation

Supervise responsible AI governance

Build an AI-ready board

Monitor transformation and impact

Questions Every Board Should Be Asking

Where could AI fundamentally change how we create value?

Is our AI ambition bold enough—and responsible enough?

Are we balancing AI opportunity with responsible governance?

Does the board have the competence to challenge and guide management effectively?

How do we know AI is creating real transformation—not simply more activity?

What Makes the Book Different

Board-specific · Value and responsibility integrated · Strategic and practical ·

Designed for boardroom action · Focused on long-term value creation

A New Era of Board Leadership

AI is reshaping what it means to lead, govern and create value. Boards need to evolve their vision, competence, structures and behaviours—balancing **innovation with stewardship, ambition with ethics, and speed with wisdom.**
